A VINNOVA Competence Center

CCCD Workshop 2007
“10 Years Success in Wireless SoC –
A Solid Foundation for the Future”

September 6-7, 2007
Grand Hotel, Lund

CCCD Workshop 2007 will be held September 6-7 at the Grand Hotel in Lund. This annual workshop disseminates academic achievements and offers an excellent opportunity for industrial and academic participants to meet and exchange ideas. The workshop will be special this year as it marks the 10th anniversary of CCCD. Besides the regular presentations and demonstrations, there will be distinct invited-talks to highlight special topics of major interest. The preliminary program is attached in this announcement.

CCCD, a VINNOVA competence center and a cooperation between industry and academia, works towards system-on-chip with the focus on mobile communication, where analog/RF, mixed signal and digital ASIC designs are all integrated in its research program.

Registration to Pia.Bruhn@eit.lth.se before August 20, 2007. For more information about CCCD, see www.es.lth.se/cccd.

Welcome!

Jiren Yuan
Director of CCCD
